SUBJECT INDEX
VOLUME 51

Acetate
  substrate for germanium uptake by *P. putida*, 1099, 1144
α-Acetohydroxy acid synthase
  desensitization of *B. lactofermentum* mutants
    improvement of L-leucine production, 1024
15-Acetyl-deoxynivalenol
  refusal factor corn, 841
Acetylene reduction
  Rhizobium strain IHP100, 868
β-*N*-Acetylhexosaminidase
  production from *M. fragilis* grown on bovine blood
    purification and properties, 1019
N-Acetylneuraminate lyase gene
  E. coli
    cloning, 562
    constitutive expression, 562
Acidogenic growth
  C. acetobutylicum
    phosphotransferase activity, 1121
Acinetobacter calcoaceticus
  exopolysaccharide yield and composition
    effect of substrates, 1304
  growth of strain RAG-1 on crude oil
    effect of emulsan, 661
  river water culture
    adaptation to aniline, 781
    evolved aniline catabolism, 781
Acinetobacter sp.
  attachment to surfaces
    effect of adsorbed macromolecules, 1321
    effect of substratum hydration, 1321
Acridine orange stain
  bacterial enumeration in water, 664
Acriflavine stain
  bacterial enumeration in water, 664
Adhesion
  S. sanguis and polymers
    study of kinetics, 910
Adsorption
  A. tumefaciens and potato tissues
    effect of temperature, 1130
    physisorption, 1130
Aerobic microorganisms
  polychlorinated biphenyl degradation
    rapid screening assay, 761
Aeromonas salmonicida
  differential partition of virulent and attenuated strains
    A-layer and lipopolysaccharide production, 1309
    two-polymer aqueous-phase systems, 1309
  fastidious atypical strains
    heme requirement for growth, 668
  survival in river water
    electrostatic mechanism, 1343
    environmental factors, 1343
Aeromonas spp.
  assay systems for identification
    evaluation of accuracy, 652
Agar bottle plate
  cultivation of anaerobes
    defined gas atmosphere, 1124
Agrobacterium tumefaciens
  adsorption to susceptible potato tissues
    effect of temperature, 1130
    physisorption, 1130
  growth stimulation
    A. vinelandii siderophores, 451
Albumin
  Mycoplasma sp. growth
    cholesterol liposomes, 281
    interaction with phospholipids, 281
Alcaligenes spp.
  cadmium resistance
    investigation of mechanisms, 515
  growth on halogenated alkanoic acids, 44
  isolation, 515
  isolation from soil, 44
  plasmids, 44
Alcohols
  hydrogen donor for methanogen growth
    bioenergetic considerations, 1056
Aldicarb
  methanogenesis stimulation in soils, 1247
Algae
  nutrient transport kinetics
    effect of light/dark cycles, 524
    microbial phosphate affinity, 524
Alginate beads
  carriers for bacterial plant inoculation, 1089
n-Alkylbenzenes
  fungal metabolism
    side-chain length, 435
Alternaria alternata
  tentoxin production
    effect of aged-culture filtrates, 368
    effect of protein inhibitors, 368
Amino acids
  catabolism by *M. elsdenii*
    influence of bacterial growth rate, 1141
Ammonium sulfate
  virus concentration
    flocculation method, 211
Amoebae
  Naegleria spp.
    cytopathology for rat neuroblastoma cells, 1133
Anabaena sp.
  aerobic hydrogen accumulation, 1063
  nitrogen fixation, 1063
Anaerobes
  cellulolytic activity
    comparison with *C. thermocellum*, 12
  cultivation in defined gas atmosphere
    agar bottle plate, 1124
  exopolymer production and characterization, 1224
Anaerobic digestion
  sulfate reduction and methane production
    microbiological aspects, 580
    technical aspects, 572
Anaerobic metabolism
  O-[methyl-^{14}C]vanillate
    strain TH-001, 84
Anaerobic sediments
  ferric iron reduction
    organic matter mineralization, 683
Aniline
  catabolism by *A. calcoaceticus*
    microbial adaptation, 781
    river water culture, 781
Anthracycline antibiotics
  production by streptomycetes
    molecular analysis, 126
Antibiotic Y
  biosynthesis by *F. avenaceum*, 743
  isolation, 743
  physicochemical and biological properties, 743
Antibodies
  trichothecene mycotoxins
    production method, 132
Antimicrobial agents
  infinite inhibition concentration
    quantitative determination, 559
Antimicrobial resistance
  marine bacteria
    polluted and unpolluted seawater, 1285
Aquatic sediments
  denitrification
    N_2O reductase assay, 18
Arthrobacter sp. strain J-1
  benzonitrilases
    characterization, 302
    purification, 302
Aryl-O-methyl-^{14}C labeling
  model lignin monomers
    enzymatic preparation method, 80
Association of Official Analytical Chemists
  tuberculocidal activity test method
    carrier evaluation, 91
ATP/DNA ratios
  V. proteolytica activity measurement, 150
Attachment
  estuarine microbial communities
    activity measurement, 157
    comparison of attached and free-living bacteria, 1110
    estimation of numbers, 1110
Attapulgite (palygorskite)
  H. capsulatum
    adhesion, 65
    effect on respiration, 65
Autoclaving
  P. shermanii propionic acid production
    whey-based medium sterilization, 427
  sterilization of Berea sandstone
    bacterial penetration, 39
Avicel-disintegrating endonuclease
  production from *H. grisea* var. *thermoidea* mutant, 1041
Azospirillum brasilense
  inoculation of wheat
    effect on rhizosphere population, 1067
    enhancement of root colonization, 1067
  interaction with *Cellulomonas* strains
    bacterial localization, 849
    nitrogen fixation, 849, 855
    wheat straw degradation, 849, 855
Azotobacter chroococcum
  growth
    dependence on sodium, 510
Azotobacter spp.
  survival in dry soils, 123
Azotobacter vinelandii
  A. tumefaciens growth stimulation
    ferrisiderophores, 451

Bacillus amyloliquefaciens α-amylase gene
introduction into *Brevibacterium lactofermentum*, 634
Bacillus thuringiensis
coproporphyrin isolation and characterization, 481
Bacillus thuringiensis subsp. *kurstaki* HD-1
bipyramidal δ-endotoxin
mode of action on silkworms, 630
Bacteria
distribution in rat mid-colon
microscopic study, 604
mucus stabilization, 604
Bacterial activity
hypertrophic lake
influence of cyanobacterial hyperscum, 609
Bacterial attachment
effect of adsorbed macromolecules, 1321
effect of substratum hydration, 1321
V. proteolytica activity
measurement methods, 150
Bacterial enumeration
clear and humic waters
stain comparison, 664
Bacterial penetration
Berea sandstone
effect of sterilization, 39
Bacterial population genetics and systematics
multilocus enzyme electrophoresis
review of methods, 873
Bacterial trophic populations
whey biomethanation
characterization, 188
enumeration, 188
Bacteriophages
concentration from water
flocculation method, 211
E. amylovora polysaccharide depolymerase
cloning and expression in *E. coli*, 862
lactic streptococcal phage c6A
DNA resistance to cleavage, 1358
psychrotrophic
effect on pseudomonads, 446
resistance determinants on pTR2030
conjugal transfer into *S. cremoris*, 1264
S. cremoris
electron microscopic heteroduplex study, 566
restriction endonuclease cleavage of DNA genome, 566
Bacterioplankton
attachment to particles in marine fjord
effect of chlorophyll *a*, 614
effect of phytoplankton, 614
automatic biomass determination
image analysis, 1199
growth rate and community structure
macrophyte decomposition, 293
Nymphaea leaves, 293
Okefenokee Swamp water, 293
Bacteroides cellulosolvens
interaction with *C. saccharolyticum*
cellulose fermentation, 710
Bacteroides spp.
chondroitin sulfate utilization
comparison of proteins, 978
enumeration in feces
species-specific DNA probes, 385
polysaccharide utilization, 385
Bananas
F. moniliforme infection
12,13-epoxytrichothecenes, 217
zearalenone, 217
Basidiomycetes
P. chrysosporium
leucine auxotroph characterization, 1170
Beef extract
virus concentration
ammonium sulfate, 211
flocculation method, 211
Benzene
Pseudomonas sp. strain T2 affinity
modulation by hydrocarbons, 469
Benzonitrilases
Arthrobacter sp. strain J-1
characterization, 302
purification, 302
Berea sandstone
bacterial penetration
effect of sterilization, 39
BGM cell line
culture method for virus isolation, 790
Bile acids
3-ketobisnorcholenol
7α-hydroxylation by fungi, 946
Bile salt sulfatase activity
Clostridium sp. strain S_2
rat intestines, 32
Biochemical characterization
E. ictaluri, 101
Biofilms
marine microbiofouling and countermeasures
OTEC heat exchangers, 1186
Bioluminescence measurement
USP sterility test
effect on endpoint determination, 349
optimum parameters, 349
suspension products, 349
Biosurfactants, rhamnolipid
production by *P. aeruginosa*
pilot plant production, 985
Biosynthesis
tentoxin
A. alternata, 368
Bisbenzimide stain
bacterial enumeration in water, 664
Black smoker bacteria
submarine hydrothermal vents
solid GELRITE medium, 238
Bombyx mori (silkworms)
B. thuringiensis subsp. *kurstaki* HD-1 δ-endotoxin
effect on vesicles and mitochondria, 630
mode of action, 630
Botulism
C. botulinum growth and toxin production
effect of water activity and pH, 844
Bovine blood
M. fragilis growth
β-*N*-acetylhexosaminidase production, 1019
Bovine rumen
methanogens
characterization as *Methanobrevibacter* spp., 201
isolation, 201
Bradyrhizobium japonicum
isolates from soybean nodules
identification by electrophoresis, 487
serocluster 123
diversity among member isolates, 1212
soybean nodules
improved typing method, 715
strain USDA 110 nitrogen fixation derivatives
nif homology patterns, 477
restriction endonuclease patterns, 477
wild-type and mutant strains
effect of lectin on nodulation, 753
Brevibacterium lactofermentum
α-acetohydroxy acid synthase mutants
improvement of L-leucine production, 1024
Brevibacterium linens CNRZ 918
methanethiol production from L-methionine
effect of oxygen and pH, 725
Broth, high-viscosity
whey fermentation
X. campestris, 203
tert-Butylphenyl diphenyl phosphate
biodegradation in diverse ecosystems, 316
Butyrate
thermophilic digesters
effect on methane production, 288

Cadmium
resistant *Alcaligenes* sp.
investigation of resistance mechanisms, 515
isolation, 515
Caldariomyces fumago
immobilization in *k*-carrageenan
chloroperoxidase production, 276
Calliandra haematocephala
saprophytic fungi
effect of imino acids on growth, 690
isolation, 690
Campylobacter jejuni
inactivation in water
chlorine, 307
monochloramine, 307
isolation from retail mushrooms
campylobacter enteritis, 449
sources of contamination, 449
low-turbidity water
isolation methods, 312
Canadian High Arctic native plants
Pseudomonas spp.
nitrogen fixation, 251
root colonization, 251
Carbohydrate
fermentation by *K. marxianus* var. *marxianus*
high-temperature ethanol production, 1314
k-Carrageenan
C. fumago immobilization
chloroperoxidase production, 276
Carriers
AOAC tuberculocidal activity test method
attachment of organisms, 91
porcelain versus stainless steel, 91
viable cells in solution, 91
Catabolism
acid-precipitable polymeric lignin

lignin-degrading *Streptomyces* spp., 171
metabolism patterns, 171
P. chrysosporium, 171
Catalase
activity in *P. fluorescens*
effect of cysteine, 418
effect of hydrogen peroxide, 418
Catechol
germanium uptake by *P. putida*
complex formation, 1099, 1144
Catechol-*O*-methyltransferase
lignin monomer preparation, 80
Cattle
rumen microflora
effect of salinomycin in feed, 340
Cell division
diatoms
radioisotope measurement method, 769
Cell lines
evaluation in virus plaque assay titrations, 1036
Cellulase
endoglucanase expression in *E. coli*
isolation and properties, 1293
endoglucanase gene isolation from *Pseudomonas* spp., 1367
Cellulolytic activity
C. thermocellum and three anaerobes
avicelase, 12
β-glucosidase, 12
CMCase, 12
Cellulomonas strains
interaction with *A. brasilense*
bacterial localization, 849
nitrogen fixation, 849, 855
wheat straw degradation, 849, 855
Cellulomonas uda
xylan-degrading enzymes
production and properties, 746
Cellulose
degradation by *Cellulomonas* strains, 849, 855
digestion by rumen bacteria
effect of Ni^{2+}, 138
inhibition by isocyanides, 138
symbiotic fermentation
B. cellulosolvens and *C. saccharolyticum*, 710
Cereals
isolation of *Fusarium* spp. and dematiaceous hyphomycetes
selective medium, 1235
Cheese
methanethiol production by *B. linens*
effect of oxygen and pH, 725
Cheese whey
feedlot waste filtrate supplement
feed supplement production, 498
optimized batch fermentation process, 498
Chemicals
microbial transformation
adaptation lag periods, 598
nutrient limitation, 598
Chitinase
S. marcescens
gene cloning, 504
partial purification, 504
Streptomyces spp.
effect of diflubenzuron, 25
Chlamydomonas sajao
population dynamics, 1161
soil aggregate stabilization, 1161
Chlorinated ethenes
methane-utilizing mixed culture
biodegradation, 720
Chlorinated water
enumeration of heterotrophic bacteria, 1047
Chlorine
C. jejuni inactivation
comparison with *E. coli*, 307
rotavirus inactivation
effect of concentration, 391
effect of pH, 391
Chlorocatechols
biotransformation in sediments, 552
Chloroguaiacols
biotransformation in sediments, 552
Chloroperoxidase
immobilized *C. fumago*
continuous production, 276
semicontinuous production, 276
Chloroveratroles
biotransformation in sediments, 552
Cholesterol
Mycoplasma sp. growth
albumin-phospholipid interaction, 281
liposomes, 281
Chondroitin sulfate
utilization by colonic *Bacteroides* spp.
comparison of proteins, 978
Clay minerals
H. capsulatum
adhesion, 65
effect on respiration, 65
interaction with siderophores
H. capsulatum respiration, 74
Clostridium acetobutylicum
acidogenic and solventogenic growth
phosphotransferase activity, 1121
fermentation products
cellular distribution, 1230
effect of pH, 1230
Clostridium botulinum type A
plasmid content
effect on toxin production, 52
Clostridium botulinum type C and D
biochemical classification, 256
sugar fermentation profiles, 256
Clostridium botulinum type G
growth and toxin production
effect of water activity and pH, 844
Clostridium perfingens
rapid extraction of plasmids, 521
Clostridium saccharolyticum
interaction with *B. cellulosolvens*
cellulose fermentation, 710
Clostridium sporogenes
plasmid content
effect on toxin production, 52
Clostridium sp. strain S_2
rat intestines
bile salt sulfatase activity, 32
isolation and identification, 32
Clostridium thermocellum
cellulolytic activity
comparison with three anaerobes, 12
endoglucanase in *E. coli*
isolation and properties, 1293
Coliforms
detection in drinking water
comparison of methods, 1007
drinking water
enumeration techniques, 1
injured bacteria, 1
Coliphages
enumeration in foods
evaluation of procedures, 956
Colonic bacteria
chondroitin sulfate utilization
comparison of proteins, 978
pig gastric and colonic mucin degradation, 1104
Contamination
C. jejuni in water
isolation methods, 312
Continuous culture
whey biomethanation
bacterial trophic populations, 188
lactose degradation, 180
Copper-induced injury
E. coli
growth and enterotoxin production, 738
Coproporphyrin
B. thuringiensis subspecies
isolation and characterization, 481
Corn
refusal by swine
Fusarium mycotoxins, 841
Coryneform bacteria
Bacillus amyloliquefaciens α-amylase gene
introduction into *Brevibacterium lactofermentum*, 634
protoplast transformation, 634
Cowpea rhizobia
competitive nodulation ability measurement
Hup trait and antibiotic resistance, 546
Rhizobium strain IHP100
nitrogenase activity, 868
symbiotic plasmid, 868
p-Cresol
microbial transformation
adaptation lag periods, 598
Crude oil
A. calcoaceticus RAG-1 growth
effect of emulsan, 661
Culture media
S. aureus recovery from swimming pools
evaluation and comparison, 699
Cyanobacteria
Anabaena sp.
aerobic hydrogen accumulation, 1063
nitrogen fixation, 1063
hyperscum on hypertrophic lake
influence on bacterial activity, 609
photosynthesis
adaptation to hydrogen sulfide, 398
M. chthonoplastes mat, 408
Cysteine
P. fluorescens
catalase activity, 418
growth, 418
protease production, 418

Deep-sea bacteria
membrane lipids
fatty acid composition, 730
pressure adaptation, 730
Degradation rate
mercury
measurement methods, 110

Dematiaceous hyphomycetes
isolation from cereals
selective medium, 1235
Denitrification
aquatic sediments
N_2O reductase assay, 18
littoral lake sediment
temporal variation, 1174
Deoxynivalenol
refusal factor corn, 841
Diacetoxyscirpenol
rabbits
antibody production method, 132
Diatoms
cell division rate measurement
germanium uptake, 769
radioisotope method, 769
2,4-Dichlorophenoxyacetic acid
effect of dissolved oxygen concentration on degradation, 950
Diflubenzuron
Streptomyces spp.
chitinase activity, 25
growth and sporogenesis, 25
Digoxin
reduction by *E. coli*
20*R*-dihydrodigoxin production, 1300
Disinfection
C. jejuni inactivation
chlorine, 307
monochloramine, 307
Dissolved oxygen concentration
effect on 2,4-dichlorophenoxyacetic acid degradation, 950
DNA
colony hybridization
Y. enterocolitica enumeration, 441
release from *S. simulans* biovar *staphylolyticus*
simple technique, 1138
Drinking water
C. jejuni inactivation
chlorine, 307
monochloramine, 307
detection of coliforms
comparison of methods, 1007
enumeration of heterotrophic bacteria, 1047
injured coliforms
enumeration techniques, 1

Eastern Europe
S. atra isolates
trichothecene production, 915
Ectoperitrophic space
X. par larvae
midgut bacteria, 657
Edwardsiella ictaluri
biochemical characterization
chondroitin sulfate degradation, 101
homogeneity, 101
Electron transport system assays
factors affecting variable activity
tetrazolium salt assay, 931
triphenyl formazan production, 931
Emulsan
A. calcoaceticus RAG-1
growth on crude oil, 661
Endoglucanase
disintegration of Avicel
production from *H. grisea* var. *thermoidea* mutant, 1041
expression in *E. coli*
isolation and properties, 1293
gene isolation from *Pseudomonas* spp., 1367
Endotoxin
removal from water
hollow-fiber membrane, 813
Energetics
S. cremoris Wg_2
leucyl-leucine hydrolysis, 95
Enteric viruses
isolation from environment
BGM cell line culture, 790
Enterobacteriaceae
isolation from raw wastewater
antibiotic resistance, 904
plasmid mobilization, 904
Environmental microcosm test system
tert-butylphenyl diphenyl phosphate
biodegradation in diverse ecosystems, 316
Enzyme-linked immunosorbent assay
staphylococcal enterotoxin detection, 885
Enzymes
aryl-O-methyl-^{14}C-labeled model lignin monomers
porcine liver catechol-*O*-methyltransferase, 80
preparation method, 80
spectrometric fluorescence analysis
microbiological detection and identification, 969
Epilimnetic bacteria
heterotrophic activity in reservoirs
effect of storms, 1259
Erwinia amylovora
phage-encoded polysaccharide depolymerase
cloning and expression in *E. coli*, 862
Escherichia coli
copper-induced injury
growth and enterotoxin production, 738
C. thermocellum endoglucanase
isolation and properties, 1293
E. amylovora polysaccharide depolymerase
cloning and expression, 862
N-acetylneuraminate lyase gene
cloning, 562
constitutive expression, 562
repair-deficient strains
toxicity of organic acids, 1364
Estuaries
biodegradation of nitrilotriacetic acid
effect of heterotrophic microbial activity, 919
effect of salinity, 919
free-living and attached bacteria in water
estimation of numbers, 1110
Estuary, eutrophic
planktonic microbial communities
activity measurement, 157
Ethanol
production by *K. marxianus* var. *marxianus*
high-temperature carbohydrate fermentation, 1314
production by *Z. mobilis*
effect of temperature, 1278
production from carbohydrates
S. cerevisiae and *Z. fermentati* hybrids, 995
production from D-xylose
P. tannophilus mutants, 1252
production from sweet sorghum
fermentation process, 115
S. cerevisiae intracellular concentration
comparison with extracellular concentration, 197
determination method, 197
variation during fermentation, 197
Ethenes, chlorinated
methane-utilizing mixed culture
biodegradation, 720
Ethylene dibromide
soil contaminant
aerobic mineralization, 588
chemical transformation, 588
Eubacteria
sulfur-reducing thermophilic isolate
submarine thermal vent, 1180
Eubacterium lentum
digoxin reduction to 20*R*-dihydrodigoxin, 1300
unsaturated long-chain fatty acids
biotransformation, 532
growth-inhibiting effect, 532
Excystation
Giardia spp. from humans and animals
gerbils as animal model, 647
use of TYI-S-33 medium, 647
Exopolysaccharides
production by *Klebsiella* spp. and *A. calcoaceticus*
effect of substrates, 1304

Fatty acids
deep-sea bacteria
membrane lipids, 730
Fatty acids, unsaturated
E. lentum
biotransformation, 532
growth-inhibiting effect, 532
Feces
Bacteroides enumeration
species-specific DNA probes, 385
isolation of *L. monocytogenes*
selective-enrichment procedure, 1127
methanogen isolation
Methanobrevibacter-like properties, 429
unique antigenicity, 429
Feedlot waste filtrate
feed supplement for ruminants
optimized batch fermentation process, 498
Feeds
Salmonella detection
effect of equilibration, 1220
effect of slow rehydration, 1220
Fermentation
C. acetobutylicum
distribution of fermentation products, 1230
effect of pH, 1230
cellulose
B. cellulosolvens and *C. saccharolyticum*, 710
cheese whey-supplemented feedlot waste filtrate
feed supplement production, 498
ethanol production from carbohydrates

S. cerevisiae and *Z. fermentati* hybrids, 995
ethanol production from sorghum
semicontinuous solid-phase system, 115
K. marxianus var. *marxianus*
ethanol production from carbohydrate, 1314
lactose metabolism in lactobacilli, 825
plant seed extracts
lactic acid bacteria, 1072
P. ostreatus
chemical composition, 1352
P. shermanii propionic acid production
sterilized whey-based medium, 427
red wine
lactic acid bacterial growth, 539
S. cerevisiae
ethanol intracellular concentration, 197
sucrose metabolism in *S. lactis*
genetic basis, 57
whey-glucose medium
high-viscosity broth production, 203
X. campestris, 203
Z. mobilis
thermal tolerance, 1278
Ferric iron
reduction in anaerobic sedments
organic matter mineralization, 683
O-[*methyl*-^{14}C]ferulate
enzymatic preparation method, 80
Filtration
low-turbidity water
C. jejuni isolation methods, 312
P. aeruginosa enumeration in water
selective medium comparison, 832
Fish
fastidious atypical *A. salmonicida* strains
heme requirement for growth, 668
identification of *Aeromonas* isolates
accuracy of methods, 652
V. anguillarum
serological study, 593
serotyping system, 593
Flavobacterium heparinum
heparinase and sulfatase synthesis
sulfur regulation, 640
Flavobacterium sp.
glyphosate-degrading microorganisms
isolation from sludge, 432
plasmid-borne parathion hydrolase gene
homology with *P. diminuta opd* gene, 926
identification, 926
Fleece rot
P. maltophilia
characterization, 346
isolation, 346
Flocculation
virus concentration
ammonium sulfate, 211
beef extract, 211
Flotation technique
soil and sediment microorganisms
in situ microscopy, 462
Fluids
industrial operations
carbon sources for bacterial growth, 1165
common components, 1165

pattern recognition analysis
microbiological detection and identification, 969
Food poisoning
human listeriosis
L. monocytogenes in milk, 438
L. monocytogenes
selective-enrichment isolation procedure, 1127
V. cholerae non-O1 serovars in shellfish
isolation from Oregon estuaries, 444
Y. enterocolitica contamination of pork
inhibition by natural microflora, 990
Food preservation
antimicrobial agents
infinite inhibition concentration determination, 559
Foods
artificial contamination with *Y. enterocolitica*
enumeration by DNA colony hybridization, 441
coliphage enumeration
evaluation of procedures, 956
fresh mushrooms
C. jejuni isolation, 449
mushrooms
W. dermatitidis-like fungus isolation, 261
plant protein
fermentation by lactic acid bacteria, 1072
Food spoilage
psychrotrophic pseudomonads
susceptibility to phages, 446
Frankia strains
long-term preservation techniques
effect on infectivity and effectivity, 694
effect on nitrogenase activity, 694
Free-living bacteria
estuarine water
comparison with attached bacteria, 1110
estimation of numbers, 1110
Fungi
7α-hydroxylation of 3-ketobisnorcholenol
reaction conditions, 946
effect of pentachlorophenol and metabolites, 1370
growth on polyvinyl chloride film
nutrient sources, 673
plasticizers, 673
n-alkylbenzene metabolism
side-chain length, 435
Fungi, saprophytic
growth
effect of nonprotein imino acids, 690
isolation from *C. haematocephala*, 690
Fungitoxicants
S. molle essential oil
effect of storage, 1085
physicochemical characterization, 1085
toxicity, 1085
Fusarin C
liquid culture medium, 381
North American isolates, 381
Fusarium avenaceum (Corda *ex* Fries) Sacc.
antibiotic Y biosynthesis, 743
Fusarium moniliforme
bananas
12,13-epoxytrichothecenes, 217
zearalenone, 217
North American isolates
fusarin C production, 381
liquid culture medium, 381
Fusarium mycotoxins
refusal factor corn, 841
Fusarium sporotrichioides
trichothecenes
origin of oxygen atoms, 493
T-2 toxin biosynthesis, 493
Fusarium spp.
isolation from cereals
selective medium, 1235

α-Galactosidase activity
P. pentosaceus
plasmid DNA, 105
Genetic probe
Y. enterocolitica enumeration, 441
Gerbils
Giardia excystation and culture
animal model, 647
Germanium
bioaccumulation by *P. putida*
effect of catechol and acetate, 1099, 1144
Giardia spp.
excystation and culture methods
gerbils as animal model, 647
use of TYI-S-33 medium, 647
β-Glucosidase
activity in marine sediments
characterization, 373
Glycine max
R. japonicum nodules
rhizobins, 457
Glycine max nodules
B. japonicum typing
improved method, 715
Glyphosate
degrading microorganisms
characterization, 432
isolation medium, 432
Goats
rumen lysine synthesis
contribution of protozoa, 1350

Halobacterium spp.
biodegradable plastic production, 214
poly(β-hydroxybutyrate) accumulation
nutrient conditions, 214
salt concentration, 214
Halogenated substrates
soil bacteria
plasmids, 44
Heat-stable enterotoxin
production by *E. coli*
effect of copper-induced injury, 738
Heavy metals
cadmium-resistant *Alcaligenes* sp.
investigation of resistance mechanisms, 515
isolation, 515
resistance in soil bacteria
plasmids, 44
Heme
fastidious atypical *A. salmonicida* strains
growth requirement, 668
Heparinase
synthesis and activity in *F. heparinum*

sulfur regulation, 640
Heterotrophic activity
epilimnetic bacteria in reservoirs
effect of storms, 1259
Heterotrophic bacteria
enumeration in chlorinated drinking water
factors in high recovery, 1047
High-pressure liquid chromatography
detection of lysine residues in protein, 1355
patulin production by *P. griseofulvum* Dierckx, 209
Histoplasma capsulatum
respiration
clay mineral-siderophore interaction, 74
effect of clay minerals, 65
Human enteric viruses
plaque assay titrations
effect of 5-iodo-2′-deoxyuridine treatment, 1036
evaluation of mixed cell types, 1036
Human feces
Bacteroides sp. enumeration
species-specific DNA probes, 385
Humicola grisea var. *thermoidea*
isolation of protease-negative mutant, 1041
production and properties of Avicel-disintegrating endonuclease, 1041
Humic water
bacterial enumeration
stain comparison, 664
Hydrocarbons
Pseudomonas sp. strain T2
affinity modulation, 469
Hydrogen
accumulation by *Anabaena* sp., 1063
Hydrogen peroxide
P. fluorescens
effect on catalase activity, 418
Hydrogen sulfide
cyanobacteria
photosynthesis adaptation, 398
7α-Hydroxylation
3-ketobisnorcholenol
reaction conditions, 946
Hypertrophic lake
cyanobacterial hyperscum
influence on bacterial activity, 609

Image analysis
automatic bacterioplankton biomass determination, 1199
Industrial metal-working fluids
carbon sources for bacterial growth
common components, 1165
Infinite inhibition concentration
antimicrobial agents
quantitative determination, 559
Injured coliforms
drinking water
enumeration techniques, 1
In sacculus technique
sheep rumens
bacterial and protozoal populations, 622
Intergeneric hybrids
S. cerevisiae and *Z. fermentati*
fermentation, 995
production by protoplast fusion, 995
Intermediary metabolism
lactose degradation
whey biomethanation, 180
Intraruminal in sacculus technique
bacterial and protozoal populations in sheep
effect of feeding frequency, 622
effect of feed sample, 622
effect of pore size, 622
5-Iodo-2′-deoxyuridine
effect on virus plaque assay titrations, 1036
p-Iodonitrotetrazolium reduction
V. proteolytica activity measurement, 150
Irradiation
Micrococcus sp.
radiation resistance detection method, 88
Isocyanides
inhibition of rumen metabolism
effect of Ni^{2+}, 138

Kaolinite
H. capsulatum
adhesion, 65
effect on respiration, 65
3-Ketobisnorcholenol
7α-hydroxylation by fungi
reaction conditions, 946
Kinetics
adhesion of *S. sanguis* to polymers, 910
mineralization in sewage
two-compartment model, 1153
nutrient transport in algae
effect of light/dark cycles, 524
microbial phosphate affinity, 524
xenobiotic compound degradation
second-order rate constants, 221
Klebsiella spp.
exopolysaccharide yield and composition
effect of substrates, 1304
isolation and enumeration
selective, differential medium, 1361
Kluyveromyces fragilis
hybrid with *S. cerevisiae*
construction by protoplast fusion, 362
Kluyveromyces marxianus var. *marxianus*
high-temperature carbohydrate fermentation
ethanol production, 1314

Lactic acid bacteria
aqueous plant seed extract fermentation
food production, 1072
growth during wine fermentation
effect of pH, 539
Lactic streptococcal bacteriophages
homology study
electron microscopic heteroduplex study, 566
restriction endonuclease cleavage of DNA genome, 566
Lactic streptococci
bacteriophage c6A
DNA resistance to cleavage, 1358
bacteriophage resistance determinants on pTR2030
conjugal transfer, 1264
effect on phages, 1272
Lactobacilli
lactose metabolism, 825
sugar transport systems, 825
Lactose
fermentation by lactobacilli
glucose and galactose moieties, 825
Lactose degradation
whey biomethanation
bacterial trophic populations, 188
intermediary metabolism, 180
Lakes
cyanobacterial hyperscum
influence on bacterial activity, 609
denitrification in sediment
temporal variation, 1174
kinetics of phenol mineralization, 891
quaternary ammonium compounds
adaptation of microbes, 356
Lake water
organic compounds at low concentration
anomalous mineralization data, 226
Lectins
M. atropurpureum Urb.
binding to roots, 328
wild-type and mutant *B. japonicum*
effect on nodulation, 753
Legionella pneumophila
protozoa
intracellular multiplication, 422
isolation from water, 422
Legionellosis outbreak
protozoan isolation from water
intracellular *L. pneumophila* multiplication, 422
Legumes
inoculation with rhizobia
effect of indigenous rhizobia on response, 1013
Leucine
biosynthesis in *P. chrysosporium*
biochemical genetic study, 1170
L-Leucine
B. lactofermentum mutants
improvement of production, 1024
Leucyl-leucine hydrolysis
S. cremoris Wg_2
effect of nigericin, 95
effect of pH, 95
effect of valinomycin, 95
energetics, 95
Lignin
S. viridosporus lignocellulose degradation
catabolism by lignin-degrading organisms, 171
Lignin monomers
aryl-O-methyl-^{14}C labeling
enzymatic preparation method, 80
Lignocellulose
degradation by *S. viridosporus*
catabolism of lignin intermediate, 171
Lipids
deep-sea bacteria
fatty acid composition, 730
pressure adaptation, 730
Lipopolysaccharides
removal from water
hollow-fiber membrane, 813
Liposomes
Mycoplasma sp. growth
albumin-phospholipid interaction, 281
Listeria monocytogenes
isolation from fecal and biologic specimens
selective-enrichment procedure, 1127

isolation from raw milk
optimal method, 438
Listeriosis
L. monocytogenes
isolation from raw milk, 438
Littorella uniflora
denitrification in lake sediment
effect of temperature and light, 1174
temporal variation, 1174
Lysine
detection of methylated residues in protein
high-performance liquid chromatography, 1355
synthesis in rumen microbial ecosystem
contribution of protozoa, 1350

Macrophytes
Nymphaea leaf decomposition
effect on bacterioplankton growth, 293
Okefenokee Swamp water, 293
Macroptilium atropurpureum Urb.
roots and root hair tips
lectin binding, 328
Malolactic fermentation
red wine
lactic acid bacterial growth, 539
Manganese
binding by attached bacteria, 163
Mapping
ILV2 gene localization
Tn*5* mutagenesis, 206
Marine bacteria
fungal metabolism
n-alkylbenzene side-chain length, 435
polluted and unpolluted seawater
antimicrobial resistance, 1285
coincident plasmids, 1285
sulfur-reducing thermophilic eubacterium
submarine thermal vent, 1180
V. vulnificus virulence
comparison with clinical isolates, 1004
Marine bacterioplankton
attachment to particles
effect of chlorophyll *a*, 614
effect of phytoplankton, 614
Marine nitrification
rate measurement
isotope methods, 244
Marine sediments
β-glucosidase activity
characterization, 373
methods of measurement, 373
Media
F. moniliforme
fusarin C production, 381
glyphosate-degrading microorganisms
isolation medium, 432
isolation of *Fusarium* spp. and dematiaceous hyphomycetes from cereals, 1235
Klebsiella isolation and enumeration, 1361
solid GELRITE medium
thermophile culturing, 238
Medicago sativa
R. meliloti population composition
effect of environmental conditions, 1077
phage typing, 1077
Megasphaera elsdenii
amino acid catabolism
influence of bacterial growth rate, 1141
Membranes
Z. mobilis
effect of temperature, 1278
Menstruation
changes in vaginal multiflora
effect of tampon use, 333
quantitative evaluation methods, 333
Mercury
methylation and degradation rates
controlling factors, 110
measurement methods, 110
Metabolism
electron transport system assays
factors affecting variable activity, 931
O-[methyl-^{14}C]vanillate
strain TH-001, 84
sucrose fermentation in *S. lactis*
genetic basis, 57
Metals
binding by attached bacteria
manganese uptake, 163
Metal-working fluids
carbon sources for bacterial growth
common components, 1165
Methane
thermophile production
effect of butyrate, 288
effect of propionate, 288
Methanethiol
production from L-methionine by *B. linens*
effect of oxygen and pH, 725
Methanobrevibacter spp.
isolation from bovine rumen
characteristics, 201
Methanogenesis
anaerobic soils
stimulation by aldicarb, 1247
chlorinated ethene biodegradation, 720
reduction of sulfate and sulfite, 703
sulfate reduction in anaerobic digestion
microbiological aspects, 580
technical aspects, 572
sulfur sources, 703
Methanogens
cultivation in defined gas atmosphere
agar bottle plate, 1124
isolation and growth in pure culture
2-propanol as hydrogen donor, 1056
isolation from bovine rumen
characterization as *Methanobrevibacter* spp., 201
isolation from human feces
Methanobrevibacter-like properties, 429
unique antigenicity, 429
reduction of sulfate and sulfite, 703
sulfur sources, 703
Methylated lysines
detection in protein
high-performance liquid chromatography, 1355
Methylation rate
mercury
controlling factors, 110
measurement methods, 110
Microbial activity measurement
eutrophic estuary
ATP/DNA ratio, 157
INT reduction, 157
thymidine incorporation, 157
Microbial communities
lake ecosystem
effect of quaternary ammonium compounds, 356
Microbially enhanced oil recovery
effect of nitrate on sulfide production, 1205
exopolymer production and characterization, 1224
Microbial transformation of chemicals
adaptation lag periods, 598
nutrient limitation, 598
Microbiofouling
estuarine microbial communities
activity measurement, 157
simulated OTEC heat exchangers
countermeasures, 1186
Micrococcus luteus
isolation from soil, 963
pyridine degradation, 963
Micrococcus sp.
radiation-inducible radiation resistance
agar plate detection method, 88
Microcoleus chthonoplastes
photosynthesis
anoxygenic-oxygenic transition, 408
evolution, 408
saline environment, 408
Microfiltration
endotoxin removal from water
hollow-fiber membrane, 813
Microgradients
attached bacteria
metabolic rate measurement, 163
metal-binding measurement, 163
Microscopy
in situ soil and sediment microorganisms
improved flotation technique, 462
Midge (*X. par*) larvae
midgut bacteria
ectoperitrophic association, 657
Midgut bacteria
X. par larvae
ectoperitrophic association, 657
Milk
L. monocytogenes isolation
optimal method, 438
mucoidness
S. cremoris Muc plasmid, 677
psychrotrophic pseudomonads
biochemical characterization, 446
lysotypes, 446
susceptibility to phages, 446
toxic shock syndrome
toxin 1 antibodies, 865
Mineralization
biodegradation of sewage
effect of substrates, 1153
kinetic models, 1153
ethylene dibromide
aerobic biodegradation, 588
ferric iron reduction
anaerobic sediments, 683
organic compounds at low concentration
anomalous data, 226
organic compounds in soil
kinetic study, 1028
phenols in lake water
kinetics, 891

Monochloramine
C. jejuni inactivation
comparison with *E. coli*, 307
Monoclonal antibodies
staphylococcal enterotoxin detection
enzyme-linked immunosorbent assay, 885
radioimmunoassay, 885
Montmorillonite
H. capsulatum
adhesion, 65
effect on respiration, 65
Moore sewer swabs
S. typhi isolation
sensitivity, 425
Mucins
pig colon and stomach
degradation by colonic bacteria, 1104
Mucor fragilis
β-*N*-acetylhexosaminidase
purification and properties, 1019
Mucus
rat mid-colon
bacterial distribution, 604
Multilocus enzyme electrophoresis
bacterial population genetics and systematics
review of methods, 873
Mushrooms
C. jejuni isolation
campylobacter enteritis, 449
sources of contamination, 449
W. dermatitidis-like fungus isolation
characterization, 261
pathogenicity, 261
Mutagenesis
ILV2 gene localization
physical mapping, 206
Mycoplasma spp.
cholesterol liposomes and growth
albumin-phospholipid interaction, 281
Mycotoxins
antibiotic Y
biosynthesis by *F. avenaceum*, 743
isolation, 743
physicochemical and biological properties, 743
antibody production method
diacetoxyscirpenol, 132
T-2 toxin, 132
F. graminearum
refusal factor corn, 841
F. moniliforme-infected bananas, 217
F. sporotrichioides trichothecenes
origin of oxygen atoms, 493
T-2 toxin biosynthesis, 493
selective medium for isolation of *Fusarium* spp. and dematiaceous hyphomycetes from cereals, 1235
trichothecene production
S. atra from Eastern Europe, 915

Naegleria spp.
cytopathology for rat neuroblastoma cells, 1133
NH_4^+
nitrogen fixation inhibition
S. alterniflora roots, 143
salt marsh sediments, 143
Nigericin
S. cremoris Wg_2
leucyl-leucine hydrolysis, 95
Nisin
production in *S. lactis*
genetic basis, 57
Nitrate
effect on sulfide production, 1205
Nitrification rate measurement
Baltic Sea
isotope methods, 244
Nitrilotriacetic acid
biodegradation in estuarine environment
effect of heterotrophic microbial activity, 919
effect of salinity, 919
Nitrogenase activity
Frankia strains
effect of long-term preservation, 694
Rhizobium strain IHP100
structural genes, 868
symbiotic plasmid, 868
S. alterniflora salt marsh
NH_4^+ switch-off regulation, 143
Nitrogen fixation
B. japonicum isolates from soybeans
identification by electrophoresis, 487
B. japonicum USDA 110 derivatives
nif homology patterns, 477
restriction endonuclease patterns, 477
Canadian High Arctic native plants
Pseudomonas spp., 251
Frankia strains
effect of long-term preservation, 694
inoculation of legumes with rhizobia
effect of indigenous rhizobia on response, 1013
R. fredii USDA 191
interaction with soybean cultivars, 898
R. meliloti pSym megaplasmid
effect of heat treatment, 1148
S. alterniflora salt marsh
NH_4^+ switch-off regulation, 143
wheat straw degradation
A. brasilense-Cellulomonas interaction, 849, 855
Nitrogen oxides
production by bacteria
detection method, 776
production by soil bacteria
effect of oxygen availability, 938
Nitrous oxide
P. aeruginosa growth
effect of nitrate and nitrite, 1239
Nitrous oxide reductase activity
aquatic sediments
direct assay, 18
Nodulation
B. japonicum isolates from soybeans
identification by electrophoresis, 487
cowpea rhizobia
measurement of competitiveness, 546
inoculation of legumes with rhizobia
effect of indigenous rhizobia on response, 1013
M. atropurpureum Urb.
effect of lectin binding, 328
R. fredii USDA 191
interaction with soybean cultivars, 898
R. meliloti in *M. sativa*
population composition, 1077
R. meliloti pSym megaplasmid
effect of heat treatment, 1148
wild-type and mutant *B. japonicum*
effect of lectin, 753
Nutrient limitation
microbial transformation of chemicals
adaptation lag periods, 598
transport kinetics in algae
effect of light/dark cycles, 524
microbial phosphate affinity, 524

Oceans
simulated OTEC heat exchangers
countermeasures to microbiofouling, 1186
Okefenokee Swamp
macrophyte decomposition
effect on bacterioplankton growth, 293
Organic acids
toxicity for repair-deficient *E. coli* strains, 1364
Organic compounds
lake water and sewage
mineralization, 226
mineralization in soil
kinetic study, 1028
Oxygen
dissolved oxygen concentration
2,4-dichlorophenoxyacetic acid degradation, 950
effect on nitrogen oxide production in soil, 938

Pachysolen tannophilus
ethanol production from D-xylose
selection of mutants, 1252
Parathion hydrolase
Flavobacterium plasmid-borne gene
homology with *P. diminuta opd* gene, 926
identification, 926
Partitioning
virulent and attenuated *A. salmonicida* strains
A-layer and lipopolysaccharide production, 1309
two-polymer aqueous-phase systems, 1309
Patulin
production by *P. griseofulvum* Dierckx
HPLC determination, 209
Pediococcus pentosaceus
plasmid DNA
α-galactosidase activity, 105
raffinose utilization, 105
sucrose hydrolase activity, 105
Penicillium griseofulvum Dierckx
patulin production and quantification
HPLC determination, 209
Penicillium spp.
tremorgen production
effect of culture conditions, 821
Pentachlorophenol
fungicidal activity of metabolites, 1370
Periphyton
transformation of chemicals
adaptation lag periods, 598
Pesticides
methanogenesis stimulation in soils, 1247
Phanerochaete chrysosporium
catabolism
acid-precipitable polymeric lignin, 171
leucine auxotroph characterization, 1170
enzyme activity, 1170
Pharmaceutical suspension products

USP sterility test
bioluminescence measurement, 349
Phenols
mineralization in lake water
kinetics, 891
Phosphate
nutrient limitation in algae
transport affinity, 524
Phosphate ester flame retardants
tert-butylphenyl diphenyl phosphate
biodegradation in diverse ecosystems, 316
Phospholipids
Mycoplasma sp. growth
cholesterol liposomes, 281
interaction with albumin, 281
N-Phosphonomethylglycine (glyphosate)
degrading microorganisms
characterization, 432
isolation medium, 432
Phosphotransferase activity
C. acetobutylicum
acidogenic and solventogenic growth, 1121
Photosynthesis
cyanobacteria
adaptation to hydrogen sulfide, 398
M. chthonoplastes mat
anoxygenic-oxygenic transition, 408
evolution, 408
Phytoplankton
bacterioplankton attachment, 614
Pigs
colon and stomach mucins
degradation by colonic bacteria, 1104
Pilot plant production
rhamnolipid biosurfactants by *P. aeruginosa*, 985
Planktonic bacteria
eutrophic estuary
activity measurement, 157
heterotrophic activity in hypertrophic lake
influence of cyanobacterial hyperscum, 609
heterotrophic activity in reservoirs
effect of storms, 1259
Plant protein
aqueous plant seed extract fermentation
lactic acid bacteria, 1072
Plants
nitrogen fixation
Canadian High Arctic natives, 251
Pseudomonas spp., 251
slow-release synthetic inoculant carrier
alginate beads, 1089
Plaque assay titrations
human enteric viruses
effect of 5-iodo-2′-deoxyuridine treatment, 1036
evaluation of mixed cell types, 1036
Plasmids
bacteriophage resistance on pTR2030
conjugal transfer into *S. cremoris*, 1264
effect on phages, 1272
C. botulinum and *C. sporogenes*
effect on toxin production, 52
cloned yeast genes
Tn*5* mutagenesis, 206
Flavobacterium parathion hydrolase gene
homology with *P. diminuta opd* gene, 926
identification, 926
marine bacteria
polluted and unpolluted seawater, 1285
pBR325
enterobacteria in wastewater, 904
P. pentosaceus
α-galactosidase activity, 105
raffinose utilization, 105
sucrose hydrolase activity, 105
pUW942
R. japonicum transposon mutagenesis, 6
rapid extraction from *C. perfringens*, 521
Rhizobium strain IHP100
structural gene location, 868
R. meliloti pSym megaplasmid
effect of heat treatment, 1148
S. cremoris Muc plasmid
mucoidness in milk, 677
S. lactis pIL7
prophage stability, 233
UV resistance, 233
S. lactis sucrose fermentation
genetic locus, 57
soil bacteria
dehalogenase genes, 44
halogenated substrate utilization, 44
heavy-metal resistance, 44
pUU204, 44
streptomycetes, 126
vector pGS9
P. syringae pv. *tomato*, 323
Plastic film
polyvinyl chloride
fungus growth, 673
Pleurotus ostreatus
growth in liquid culture
chemical composition, 1352
Poly(β-hydroxybutyrate)
accumulation by halobacteria
nutrient conditions, 214
salt concentration, 214
biodegradable plastic production, 214
Polychlorinated biphenyls
degradation by aerobic microorganisms
chromatographic analysis, 761
rapid screening assay, 761
Polymer aqueous-phase systems
virulent and attenuated *A. salmonicida* strains
differential partition, 1309
Polymers
kinetics of adhesion of *S. sanguis*, 910
production by anaerobic bacterial growth
characterization, 1224
Polysaccharide depolymerase
E. amylovora
cloning and expression in *E. coli*, 862
Polysaccharides
utilization by *Bacteroides* spp., 385
Polyvinyl alcohol oxidase
Pseudomonas sp. strain VM15C
isolation and purification, 268
Polyvinyl chloride film
fungus growth
nutrient sources, 673
plasticizers, 673
Population dynamics
C. sajao, 1161
Population genetics
multilocus enzyme electrophoresis
review of methods, 873
Pork
Y. enterocolitica serotype O3
inhibition by natural microflora, 990
Porphyrins
B. thuringiensis coproporphyrin
isolation and characterization, 481
Potatoes
adsorption of *A. tumefaciens*
effect of temperature, 1130
Preservation
Frankia strains
effect on infectivity and effectivity, 694
effect on nitrogenase activity, 694
2-Propanol
hydrogen donor for methanogen growth, 1056
Prophages
stability in *S. lactis*
pIL7 cloning, 233
Propionate
thermophilic digesters
effect on methane production, 288
Propionibacterium shermanii
propionic acid production
sterilized whey-based medium, 427
Propionic acid
production by *P. shermanii*
sterilized whey-based medium, 427
Protease
H. grisea var. *thermoidea* mutants
Avicel-disintegrating endonuclease, 1041
production by *P. fluorescens*
effect of cysteine, 418
Proton motive force
S. cremoris Wg_2
leucyl-leucine hydrolysis, 95
Protoplast fusion
yeast hybrid construction, 362
Protoplasts
streptomycetes
formation and regeneration, 126
Protoplast transformation
coryneform bacteria, 634
Protozoa
in vitro rumen microbial ecosystem
contribution to lysine synthesis, 1350
isolation from water
intracellular *L. pneumophila* multiplication, 422
Pseudomonads, psychrotrophic
milk origin
biochemical characterization, 446
lysotypes, 446
susceptibility to phages, 446
Pseudomonas aeruginosa
enumeration in water by membrane filtration
selective medium comparison, 832
growth on nitrous oxide
effect of nitrate and nitrite, 1239
rhamnolipid biosurfactants
pilot plant production, 985
Pseudomonas diminuta
opd gene
homology with *Flavobacterium* parathion hydrolase gene, 926
Pseudomonas fluorescens

attachment to surfaces
effect of adsorbed macromolecules, 1321
effect of substratum hydration, 1321
effect of cysteine
catalase activity, 418
growth, 418
protease production, 418
Pseudomonas fluorescens subsp. *cellulosa*
endoglucanase gene isolation, 1367
Pseudomonas maltophilia
isolation from fleece rot lesions
characterization, 346
Pseudomonas putida
germanium bioaccumulation
effect of catechol and acetate, 1099, 1144
Pseudomonas spp.
Canadian High Arctic native plants
nitrogen fixation, 251
root colonization, 251
endoglucanase gene isolation, 1367
growth on halogenated alkanoic acids, 44
isolation from soil, 44
plasmids, 44
quinoline transformation
characterization of intermediates, 1332
Pseudomonas sp. strain T2
toluene and benzene affinity
modulation by hydrocarbon exposure, 469
Pseudomonas sp. strain VM15C
membrane-bound PVA oxidase, 268
PQQ-dependent polyvinyl alcohol dehydrogenase
isolation and purification, 268
Pseudomonas syringae pv. *tomato*
Tn*5* insertion mutations
characterization, 323
generation, 323
Psychrotrophs
milk origin
biochemical characterization, 446
lysotypes, 446
susceptibility to phages, 446
Pyridine
degradation by *M. luteus* in soil, 963
Pyrroloquinoline quinone-dependent polyvinyl alcohol dehydrogenase
Pseudomonas sp. strain VM15C
isolation and purification, 268

Quaternary ammonium compounds
lake ecosystem
adaptation of microbes, 356
Quinoline
transformation by *Pseudomonas* sp.
characterization of intermediates, 1332

Rabbits
trichothecene mycotoxins
antibody production method, 132
Radiation resistance
Micrococcus sp.
agar plate detection method, 88
Radioimmunoassay
staphylococcal enterotoxin detection, 885
Radioisotope measurement
diatom cell division rates, 769
Raffinose utilization
P. pentosaceus
plasmid DNA, 105
Rat intestinal microflora
Clostridium sp. strain S_2
bile salt sulfatase activity, 32
isolation and identification, 32
Rat mid-colon
bacterial distribution
microscopic study, 604
mucus stabilization, 604
Reduction
E. lentum reduction of digoxin, 1300
Rehydration
Salmonella detection in feeds, 1220
Resazurin
oxidation by microorganisms
production of nitrogen oxides, 776
Reservoirs
epilimnetic bacteria
effect of storms on heterotrophic activity, 1259
Respiration
H. capsulatum
clay mineral-siderophore interaction, 74
effect of clay minerals, 65
Rhamnolipid biosurfactants
production by *P. aeruginosa*
pilot plant production, 985
Rhizobia
competitive nodulation ability measurement
Hup trait and antibiotic resistance, 546
inoculation of legumes
effect of indigenous rhizobia on response, 1013
Rhizobins
soybean-*Rhizobium* system
free-amino-acid pool, 457
Rhizobium fredii USDA 191
interaction with soybean cultivars
competition with *B. japonicum*, 898
symbiotic effectiveness, 898
Rhizobium japonicum
free-amino-acid pool
rhizobins, 457
plasmid pUW942
R′ plasmid excision, 6
transposon mutagenesis, 6
Rhizobium meliloti
population composition in *M. sativa* nodules
effect of environmental conditions, 1077
phage typing, 1077
Sym mutants from heat treatment
analysis of megaplasmid, 1148
Rhizobium strain IHP100
acetylene reduction, 868
isolation, 868
nitrogenase activity, 868
symbiotic plasmid
nitrogenase structural gene location, 868
Rhizosphere bacteria
slow-release inoculation of plants
alginate beads, 1089
wheat inoculation with *A. brasilense*
depression of soil microflora, 1067
River water
A. calcoaceticus
adaptation to aniline, 781
evolved aniline catabolism, 781
A. salmonicida survival
electrostatic mechanism, 1343
environmental factors, 1343
Rotaviruses
human and simian rotavirus
inactivation by chlorine, 391
R′ plasmid excision
slow-growing *R. japonicum* strains
plasmid pUW942 conjugal transfer, 6
Rumen bacteria
in sacculus technique in sheep
effect of feeding frequency, 622
effect of feed sample, 622
effect of pore size, 622
M. elsdenii
amino acid catabolism, 1141
metabolism
effect of Ni^{2+}, 138
inhibition by isocyanides, 138
methanogens
characterization as *Methanobrevibacter* spp., 201
isolation, 201
salinomycin in cattle feed
enumeration and changes, 340
Rumen microbial ecosystem
lysine synthesis from aspartate
contribution of protozoa, 1350
Ruminants
feed supplement production
feedlot waste filtrate fermentation, 498

Saccharomyces cerevisiae
ethanol intracellular concentration
determination method, 197
hybrid with *K. fragilis*
construction by protoplast fusion, 362
intergeneric hybrids with *Z. fermentati*
ethanol production from carbohydrates, 995
fermentation, 995
sherrylike wine production
sexual isolation, 395
taxonomic characteristics, 395
sweet sorghum fermentation
fuel ethanol production, 115
Salinomycin
cattle feed
effect on volatile fatty acids, 340
rumen microflora changes, 340
Salmonella spp.
detection in feeds and feed ingredients
effect of equilibration, 1220
effect of slow rehydration, 1220
Salmonella typhi
Moore sewer swabs
sensitivity, 425
Salt marsh
nitrogenase activity
NH_4^+ switch-off regulation, 143
Saprophytic fungi
growth
effect of nonprotein imino acids, 690
isolation from *C. haematocephala*, 690
Schinus molle
essential oil
effect of storage, 1085
fungitoxic activity, 1085
physicochemical characterization, 1085

Seawater
nitrification rate measurement
isotope methods, 244
polluted and unpolluted samples
plasmids and antimicrobial resistance in bacteria, 1285
Sediments
β-glucosidase activity
characterization, 373
methods of measurement, 373
chloroguaiacols, chlorocatechols, and chloroveratroles
biotransformation, 552
sorption, 552
denitrification
N_2O reductase assay, 18
denitrification activity in lakes
temporal variation, 1174
ferric iron reduction
organic matter mineralization, 683
in situ microorganisms
improved flotation method for microscopy, 462
V. cholerae non-O1 serovars
isolation from Oregon estuaries, 444
Selective media
P. aeruginosa enumeration in water, 832
Seroclusters
B. japonicum
diversity among member isolates, 1212
Serovars
V. cholerae
isolation from surface waters in Colorado, 1216
Serratia marcescens
chitinase
gene cloning, 504
partial purification, 504
Sewage
mineralization
effect of substrates, 1153
kinetic models, 1153
organic compounds at low concentration
anomalous mineralization data, 226
S. typhi isolation
Moore sewer swab sensitivity, 425
Sheep
fleece rot and fly-strike lesions
P. maltophilia isolation, 346
intraruminal in sacculus technique
bacterial and protozoal populations, 622
Shellfish-associated human illness
V. cholerae non-O1 serovars
isolation from Oregon estuaries, 444
Siderophores
A. vinelandii
A. tumefaciens growth stimulation, 451
phytopathogen suppression, 451
interaction with clay minerals
H. capsulatum respiration, 74
Silkworms (*Bombyx mori*)
B. thuringiensis subsp. *kurstaki* HD-1 δ-endotoxin
effect on vesicles and mitochondria, 630
mode of action, 630
Sludge
glyphosate-degrading microorganisms
characterization, 432
isolation medium, 432
Sodium
A. chroococcum growth, 510
Soil
A. chroococcum growth
dependence on sodium, 510
biogenic nitrogen oxide production
effect of oxygen availability, 938
B. japonicum seroclusters, 1212
C. sajao population dynamics, 1161
dry soils
Azotobacter survival, 123
ethylene dibromide
aerobic mineralization, 588
chemical transformation, 588
in situ microorganisms
improved flotation method for microscopy, 462
mineralization of organic compounds
kinetic study, 1028
pyridine degradation by *M. luteus*, 963
Soil bacteria
growth on halogenated alkanoic acids, 44
plasmids
halogenated substrate utilization, 44
heavy-metal resistance, 44
Solventogenic growth
C. acetobutylicum
phosphotransferase activity, 1121
Soybean nodules
B. japonicum typing
improved method, 715
Soybean-*Rhizobium* system
free-amino-acid pool
rhizobins, 457
Soybeans
B. japonicum isolates
identification by electrophoresis, 487
interaction with *R. fredii* USDA 191
symbiotic effectiveness, 898
nodulation by *B. japonicum*
effect of lectin, 753
Spartina alterniflora
nitrogenase activity
NH_4^+ switch-off regulation, 143
Spectrometry
microbiological detection and identification
enzyme-substrate fluorescence analysis, 969
Spore formation
Streptomyces spp.
effect of diflubenzuron, 25
Sporicidal activity
AOAC test method
carrier evaluation, 91
Stachybotrys atra
Eastern Europe
trichothecene production, 915
Stains and staining methods
bacterial enumeration in water
comparison, 664
Staphylococcal enterotoxins
monoclonal and polyclonal detection systems
enzyme-linked immunosorbent assay, 885
radioimmunoassay, 885
Staphylococcus aureus
recovery from swimming pools
culture media, 699
stress-inducing conditions, 699
toxic shock syndrome toxin 1
antibodies in bovine milk, 865
Staphylococcus simulans biovar *staphylolyticus*
DNA release from cells
simple technique, 1138
Sterilization
P. shermanii propionic acid production
autoclaved whey-based medium, 427
Sterilization methods
bacterial penetration through sandstone
autoclaving, 39
dry heat, 39
Storms
epilimnetic bacteria in reservoirs
effect on heterotrophic activity, 1259
Streptococcus cremoris
bacteriophage resistance determinants on pTR2030
conjugal transfer, 1264
effect on phages, 1272
lactic streptococcal bacteriophages
electron microscopic heteroduplex study, 566
restriction endonuclease cleavage of DNA genome, 566
mucoidness in milk cultures
Muc plasmid, 677
Streptococcus cremoris Wg_2
leucyl-leucine hydrolysis
effect of nigericin, 95
effect of pH, 95
effect of valinomycin, 95
energetics, 95
Streptococcus lactis
bacteriophage c6A
DNA resistance to cleavage, 1358
bacteriophage resistance determinants on pTR2030
effect on phages, 1272
plasmid-mediated UV resistance
cloning, 233
prophage stability, 233
sucrose metabolism and nisin production
genetic basis, 57
Streptococcus sanguis
kinetics of adhesion to polymers, 910
Streptomyces spp.
catabolism
acid-precipitable polymeric lignin, 171
growth and sporogenesis
effect of diflubenzuron, 25
Streptomyces viridosporus
catabolism of lignin degradation intermediate
lignin-degrading *Streptomyces* spp., 171
metabolism patterns, 171
P. chrysosporium, 171
Streptomycetes
anthracycline production
plasmid isolation, 126
protoplast formation and regeneration, 126
transformation and transfection, 126
Sucrose
fermentation in *S. lactis*
genetic basis, 57
Sucrose hydrolase activity
P. pentosaceus
plasmid DNA, 105

Sugars
metabolism and transport in lactobacilli, 825
Sulfatase
synthesis and activity in *F. heparinum* sulfur regulation, 640
Sulfate reduction
effect of nitrate, 1205
methane production in anaerobic digestion
microbiological aspects, 580
technical aspects, 572
methanogenic bacteria, 703
Sulfide production
effect of nitrate, 1205
Sulfite reduction
methanogenic bacteria, 703
Sulfur
thermophilic eubacterium
submarine thermal vent, 1180
Sulfur regulation
F. heparinum
heparinase synthesis and activity, 640
sulfatase synthesis and activity, 640
Sulfur sources
methanogenic bacteria
effect on growth, 703
Surface-colonizing bacteria
metabolism, 163
metal binding, 163
Sweet sorghum
fuel ethanol production
fermentation process, 115
Swimming pools
S. aureus recovery
culture media, 699
Systematics
multilocus enzyme electrophoresis
review of methods, 873

Tampons
effect of vaginal flora
quantitative evaluation methods, 333
Tentoxin
production by *A. alternata*
effect of aged-culture filtrates, 368
effect of protein inhibitors, 368
Thermophiles
black smoker bacteria
solid GELRITE medium, 238
cellulolytic activity
comparison with *C. thermocellum*, 12
methane production
effect of butyrate, 288
effect of propionate, 288
sulfur-reducing eubacterium
submarine thermal vent, 1180
Thymidine incorporation
V. proteolytica activity measurement, 150
Timothy hay (*Phleum pratense*)
degradation
effect of isocyanides, 138
Tn*5*
mutagenesis
ILV2 gene localization, 206
Toluene
Pseudomonas sp. strain T2 affinity
modulation by hydrocarbon exposure, 469
Toxicity
organic acids
repair-deficient *E. coli* strains, 1364
Toxic shock syndrome
toxin 1 antibodies in bovine milk, 865
Toxin production
C. botulinum type G
effect of water activity and pH, 844
Toxins
B. thuringiensis subsp. *kurstaki* HD-1
δ-endotoxin
mode of action on silkworms, 630
C. botulinum
antigenic structure, 256
bacterial classification, 256
effect of phages, 256
production by clostridia
effect of plasmids, 52
Transformation
coryneform bacteria, 634
Transport kinetics
algae
effect of light/dark cycles, 524
microbial phosphate affinity, 524
Transposon mutagenesis
P. syringae pv. *tomato*, 323
slow-growing *R. japonicum* strains
mercury-resistant transconjugants, 6
plasmid pUW942 conjugal transfer, 6
Tremorgens
production by *Penicillium* spp.
effect of culture conditions, 821
Trichloroethylene
methane-utilizing mixed culture
biodegradation, 720
Trichothecenes
antibody production method
diacetoxyscirpenol, 132
T-2 toxin, 132
F. sporotrichioides
origin of oxygen atoms, 493
T-2 toxin biosynthesis, 493
S. atra from Eastern Europe, 915
T-2 toxin
F. sporotrichioides
biosynthesis, 493
origin of oxygen atoms, 493
rabbits
antibody production method, 132
Tuberculocidal activity
AOAC test method
carrier evaluation, 91
Typhoid
S. typhi isolation
Moore sewer swab sensitivity, 425

Unsaturated long-chain fatty acids
E. lentum
biotransformation, 532
growth-inhibiting effect, 532
USP sterility test
endpoint determination
bioluminescence measurement, 349
UV resistance
S. lactis
pIL7 cloning, 233

Vaginal microflora
changes during menstruation
effect of tampon use, 333
quantitative evaluation methods, 333
Valinomycin
S. cremoris Wg_2
leucyl-leucine hydrolysis, 95
O-[methyl-^{14}C]vanillate
anaerobic C_1 metabolism
carbon flow pattern, 84
strain TH-001, 84
enzymatic preparation method, 80
Vibrio anguillarum
serological study, 593
serotyping system, 593
Vibrio cholerae
non-O1 serovar isolation
effect of temperature, 444
geographic distribution, 444
Oregon estuaries, 444
non-O1 serovars
isolation from surface waters in Colorado, 1216
Vibrio proteolytica
activity measurement methods
ATP/DNA ratios, 150
p-iodonitrotetrazolium reduction, 150
thymidine incorporation, 150
effect of nutrients on activity, 150
Vibrios
V. anguillarum
serological study, 593
serotyping system, 593
Vibrio vulnificus
virulence of marine strains
comparison with clinical isolates, 1004
Vigna unguiculata (L.) Walp.
nodulation by cowpea rhizobia
measurement of competitiveness, 546
Virulence
marine *V. vulnificus* strains
comparison with clinical isolates, 1004
Viruses
concentration from water
flocculation method, 211
human and simian rotaviruses
inactivation by chlorine, 391
isolation from environment
BGM cell line culture, 790
enterovirus assay system, 790
plaque assay titrations
effect of 5-iodo-2′-deoxyuridine treatment, 1036
evaluation of mixed cell types, 1036
recovery from water
flocculation procedure, 1326

Wangiella dermatitidis-like fungus
isolation from mushrooms
characterization, 261
pathogenicity, 261
Wastewater
effect of nitrate on sulfide production, 1205
isolation of enterobacteria
antibiotic resistance, 904
plasmid mobilization, 904
S. typhi isolation
Moore sewer swab sensitivity, 425
Water
A. salmonicida survival in rivers, 1343
electrostatic mechanism, 1343
environmental factors, 1343
bacterial enumeration
stain comparison, 664
chlorinated drinking water
enumeration of heterotrophic bacteria, 1047
C. jejuni inactivation
chlorine, 307

monochloramine, 307
C. jejuni isolation
membrane filtration methods, 312
coliform detection in drinking water
comparison of methods, 1007
cooling towers
legionellosis outbreak, 422
drinking water
injured coliforms, 1
endotoxin removal
hollow-fiber membrane, 813
epilimnetic bacteria in reservoirs
effect of storms on heterotrophic activity, 1259
free-living and attached bacteria in estuaries
estimation of numbers, 1110
halogenated swimming pools
S. aureus recovery, 699
mercury methylation and degradation
rate measurement, 110
Okefenokee Swamp
bacterioplankton growth, 293
macrophyte decomposition, 293
P. aeruginosa enumeration
membrane filtration, 832
selective medium comparison, 832
phenol mineralization in lakes
kinetics, 891
protozoan isolation
intracellular *L. pneumophila* multiplication, 422
surface-colonizing bacteria
metabolism, 163
metal binding, 163
V. cholerae non-O1 serovars
isolation from Oregon estuaries, 444
isolation in Colorado, 1216
viruses and phages
concentration method, 211
virus recovery
flocculation procedure, 1326
xenobiotic compound degradation
effect of nutrients, 221
microbial rate constants, 221
Water activity
C. botulinum type G
effect on toxin production and growth, 844
Wheat
inoculation with *A. brasilense*
effect on rhizosphere population, 1067
enhancement of root colonization, 1067
Wheat straw degradation
A. brasilense-Cellulomonas interaction, 855
Whey
fermentation by *X. campestris*
high-viscosity broth production, 203
Whey-based medium
P. shermanii propionic acid production
effect of pasteurization, 427
inhibitory effect of autoclaving, 427
Whey biomethanation
bacterial trophic populations
characterization, 188
enumeration, 188
lactose degradation
intermediary metabolism, 180
White rot basidiomycetes
P. chrysosporium
leucine auxotroph characterization, 1170
Wine
malolactic fermentation
lactic acid bacterial growth, 539
yeast populations
sexual isolation, 395
taxonomic characteristics, 395

Xanthomonas campestris
whey fermentation
high-viscosity broth production, 203
Xenobiotic compounds
degradation in water
effect of nutrients, 221
second-order rate constants, 221
β-Xylanase
C. uda
production and properties, 746
Xylan degradation
C. uda enzymes
production and properties, 746
Xylotopus par larvae
midgut bacteria
ectoperitrophic association, 657

Yeasts
high ethanol production, 362
hybrid construction
protoplast fusion, 362
ILV2 gene localization
Tn*5* mutagenesis, 206
K. marxianus var. *marxianus*
ethanol production from carbohydrate, 1314
lactose assimilation, 362
P. tannophilus mutants
ethanol production, 1252
S. cerevisiae in wine production
sexual isolation, 395
taxonomic characteristics, 395
Yersinia enterocolitica
artificially contaminated food
enumeration by DNA colony hybridization, 441
serotype O3 in pork
inhibition by natural microflora, 990

Zea mays
lignocellulose
degradation, 171
Zearalenone
F. moniliforme-infected bananas, 217
refusal factor corn, 841
Zygosaccharomyces fermentati
intergeneric hybrids with *S. cerevisiae*
ethanol production from carbohydrates, 995
fermentation, 995
Zymomonas mobilis
thermal tolerance
changes in membrane composition, 1278
